

MANUFACTURING

The manufacturing industry represents companies that, through the use of tools, human labor, machinery, and chemical processing, turn raw materials or parts into finished products that can be sold in the marketplace.

“As everyone is focused on AI, VR, and AR, we can’t forget that things still need to be made and built. Innovation and technology require physical components. There’s a huge opportunity for manufacturers to thrive in the area.”

– Christine Holly Ngo
VP of Operations & Business Development at Silicon Valley Elite Manufacturing
